Devoted Exclusively To Carmel and Vicinity

VOLUME NO. TWO — CARMEL-BY-THE-SEA, CALIF., THURSDAY, SEPT. 6, 1934 — NUMBER 32

PAGEANT COMMITTEE PLEASED WITH RESULTS

"I feel very kindly toward everybody who helped make the Serra Pageant-Fiesta a success," said D. L. Staniford, head of the executive committee, Wednesday. "We are well satisfied," he stated, "although we made a few mistakes—not big ones. However, we will have more experience next year."

Mr. Staniford spoke very highly of the splendid cooperation he had received in advertising the occasion and said the work this year makes a good nucleus for the next pageant.

The committee was much pleased with the fact that the last two nights saw the grandstand even more nearly filled than at the previous exhibitions. They felt that the word had gone out that the pageant was really worth while.

The executive committee met Tuesday evening for dinner at the La Playa and voted thanks to all who had helped and asked all heads of committees to convey to their workers the deep appreciation of the committee as a whole. Rough estimates of the receipts were placed at $6,000 with not more than $2500 expense. It was decided at the meeting to keep the lumber of which the grandstand was built to be used at next year's fiesta.

Present at the dinner were: Rev. Michael O'Connell, A. T. Shand, Floyd Mangrum, Frank Sheridan, Frederick Burt, Harry Downie, J. L. Cockburn, W. J. Crabbe, Don Hale, D. L. Staniford, Willard Whitney, J. H. Thoburn, Senator Tickle, Clem Higgins, Fred Godwin, Milton Latham, Tom Thienes and Geo. Marion.

Lee Hull who has been with his grandparents, Mr. and Mrs. B. F. Minges, here through the summer left for his home in Hollister to begin his school year.

POST OFFICE WILL BE MOVED TO OCEAN SAT.

When patrons of the Carmel postoffice go for their mail next Tuesday morning, after the Admission Day holiday, they will have to bear in mind the new location at Ocean and Mission.

The traffic problem on Dolores will have been relieved so that many who used to shun that section will feel that they can drive there in safety.

Only one store, so far as is known, has decided to move from the Dolores district to be nearer the new postoffice.

All postoffice employes are anxious to make the move since they will have better and lighter room to work in. The room for the patrons also is much better laid out.

With a little less congestion, old timers hope that some of the former "charm" of greeting old friends at the post office may be restored.

OLD MISSION GUILD TO GIVE PARTY 11TH

There will be another of those delightful card parties put on by the Old Mission Guild at Serra Crespi Hall next Tuesday evening.

There will be a plenty of worth while prizes and the usual good time is promised.

MAN IS RETURNED TO FACE SERIOUS CHARGE

At his completion of a six year term in Sing Sing, Fred Harris will be returned to this county to face charges of embezzlement from George Gordon Moore when he was Moore's bookkeeper about six years ago.

Deputy Sheriff Alex Bordges has gone to New York to bring Harris back.

Caroline Chew Returns to Playhouse Sunday Night

Caroline (King Lan) Chew, the beautiful young Chinese dancer who captivated a capacity audience at the Playhouse a month ago will give another brilliant program Sunday night. Since her former appearance here she has been engaged to dance with the Portland Symphony Orchestra, after which she will make a tour of Amercia preparatory toward certain European triumph.

The young artist, as shown at her recent Carmel recital is a fascinating combination of Orient and Occident. Eastern tradition and culture mingle with the swift alertness derived from Western education and technical training. The result is an art of unusual grace and beauty. Praised by all the reviewers of her recent local program, and with a delighted audience demanding repeated encores, Miss Chew may expect the welcome of another full house this coming Sunday night. Curtain at eight-thirty; tickets at the new uptown office of the Playhouse, Ocean avenue and Monte Verde, opposite Normandy Inn, or at the box-office on the night of performance.

SUNSET OPENS WITH LARGE REGISTRATION

With the enrollment of 322 pupils in Sunset this week, Carmel's school has an increase of approximately ten per cent over last year's list. Boys outnumber girls by twenty, the register showing 171 boys and 151 girls.

New pupils who enrolled are as follows:

Low first—Benny Stillwell, Henry Moultini, Billy Phillips, Polly Parker, Alice V. Christierson, Freddie Barbour, Pamela Dormody and Audrey Mawdsley.

High First—John Silver.

Second Grade—Billy Richardson, Phyllis Jones, Stanley Ewig, Peter Hoffman, Harry Hunt, David Pope, Jasper Moody.

Third Grade—Arthur Jones, Jewel Moody, William V. Christierson, Helen Mas.

Fourth Grade—Edward Roxbury, Buddy Schauffler, Bob Barbour, Tom Moore, Donald Miller, and Zada Martin.

Sixth Grade—Gloria De Gaston, Margaret Hoffman, Jane Silver, Bobbie Frolli, Eugene La Rhier.

Seventh Grade— Barbara Bryant, Barbara De Gaston, Milton McLaren, Clara J. Roxbury, Robert Schauffler, Priscilla Watson, James Barton, Boice Richardson, William Frolli.

Eighth Grade— Frank Ross, Charles Hellam, James Muscutt, Margaret Dorrance.

In his opening remarks to the teachers, Superintendent O. W. Bardarson laid stress on the fact that there are to be no fundamental changes in the policy or program of the school, character, education and citizenship to be the main objectives. Mr. Bardarson's address follows:

"There will be no fundamental change in the policy or program of the Sunset School. We will continue to place emphasis on:

1. The tool subjects. Using the finest proved techniques in order to assist the children in acquiring command of the fundamental processes of reading, writing, and arithmetic so that they may advance toward and in the main objectives of education.

2. Cultural activities to lend sensitivity, discrimination and appreciation of intangible values to broaden personality and to give tone and meaning to life's more subtle influences.

3. Character, Education and Citizenship Studies to install in each boy and girl those qualities that will carry them to honorable manhood and womanhood with respect for home and country and regard for the rights of their fellowmen.

"The Citizenship Studies afford the finest medium for the realization of the fundamental objectives of Education. Through properly guided activities you may provide meaningful situations leading to purposeful activity. It is better for the child to feel that he is assembling and considering conclusions rather than static facts, as life in its ebb and flow, is continually bringing up new issues, new problems, and the necessity of new solutions. The training children acquire in developing an open, flexible, inquiring attitude will aid in developing a race of men and women capable of meeting issues and creating an order and way of life that is ever-growing, ever-evolving to carry mankind to a higher economic, social, and cultural plane.

"This philosophy is in complete harmony with American Idealism and Tradition. I propose you consider it carefully in planning your classroom activities. Our course in Citizenship studies covering the wide field of history, geography, civics, morals and manners, class and student body activities affords an opportunity to develop poise and bearing, self-control, understanding, reverence of the flag, respect for our Consittution and love of country.

"The children should be required to give pledge to the flag each morning and each boy and girl above the third grade should learn the American's Creed."

COUNCIL HAS BUSY MEETING THIS WEEK

Comparing the Village Fair held by the Forest Theatre group last week-end to the "invasion of the beach area with hot dog stands," Lewis Josselyn adressed the city council at their regular meeting Wednesday night.

"We know it is too late to do anything now," Mr. Josselyn said, "but for myself and my neighbors I am asking that this fair be not allowed to create a precedent."

Mr. Josselyn charged that the crowds disturbed the peace and quiet of the neighborhood and that had he wished to drive out of a place he owned in the neighborhood he would not have been able to do so. He also charged that the city had "surrendered" to the Forest Theatre group.

Other speakers objected to the condition the grounds had been left in, stating they constituted a fire hazard. Objections to dancing on the stage as unsafe and to people being under the platform while the crowds were dancing on the stage were also brought out.

Charges against the group were summed up as: violation of the fire ordinance; violation of the business ordinance and violations of the laws of safety.

A letter was read from Mrs. Eva L. Ford, agent for Pedro Lemos, asking that the city not cut down condemned trees on the Lemos property at Seventh and Casanova until Mr. Lemos returns to Carmel. Councilman Burge said the trees had been dead three years and were a constant danger to the public. Mr. Lemos was allowed until October 1 to have the trees down.

Contract for the removal of 56 trees on Fourth street was let to M. J. Murphy Lumber company at a price of $250. Commissioner Burge pointed out that due to the nature of the work the city would have to have special insurance for the workers which would amount to $256. plus 15 per cent of the cost of the labor. The wood, he said, would have to dry for a year and at that time could possibly be sold for around $400. Mayor Thoburn was appointed to close the contract.

A group of residents on Scenic asked that the trees obstructing their view of the ocean be trimmed. Street Commissioner Burge was ordered to do the work.

A copy of the airport lease was acknowledged and a letter from City Manager Dorton of Monterey was read wherein Mr. Dorton attempted to show why Carmel should share equally with Monterey and Pacific Grove in the lease of the field from Del Mnnte. Carmel, he suggested, was probably the most "airminded," of the three places.

About $10,000 it was reported would go for labor on the field, and Councilman Rowntree reported that Manager Dorton had informed him that should Carmel pay for a third of the lease, one-third of the $10,000 would be given to Carmel's unemployed. The question was raised as to whether Carmel could do better for her unemployed by spending the $900 here or by spending that amount over five years, the work to be done within not more than a six weeks' span.

Councilman Catlin objected to the statement that Carmel would share equally in the benefits from the airport. "If they submit a fair proposition, we should go into it," he said, further letting it be known that he would consider Carmel's just share at no more than $5 per month.

Councilman Burge objected, saying Carmel had "too many five-dollars."

The matter will be taken up further with Manager Dorton.

Councilman Norton, fire commissioner, asked for the purchase of 300 feet of fire hose, at $1.20 a foot. When it was found that this amount wuld exceed the limit allowed by the ordinance, the amount was cut to 150 feet, which was allowed, the council feeling that it is better to buy but a small amount of needed hose each year than to buy a large amount at one time.

Fay Cooper of Cooper's garage, appeared to ask what disposition should be made of a Chevrolet which was taken from the streets of the city three years ago and left with him. Storage has accumulated in a sum of more than $240. Mr. Cooper asked for permission to sell the car for $30 and get it out of the way. The matter will be taken up with the city attorney, who was not present at Wednesday night's meeting.

The second reading of the tax ordinance in which the rate was lowered 2 cents on the general fund and two cents on the library fund, was given, all councilmen voting yes, except Councilman Rowntree, who objected to the cutting of the library tax.

The cut in the salaries of city employes receiving more than $75 per month, which was provided for in July 1932, continued in January 1933, and in February, 1934, was extended to January 1935.

Councilman Burge asked and received permission to cut six trees on Scenic and replace them with 6 to 7 foot cypresses.

Adjournment was taken for two weeks.

COMMITTEE HEARS REPORT ON WATER SITUATION

According to Charles T. Thomas, who was appointed as secretary of the fact finding committee selected several weeks ago by the three cities to look into the water rates for the peninsula, the charges are due to heavy overhead.

Mr. Thomas stated that on investigation he found the ownership vested in the Western Utilities corporation, which is controlled by the H. M. Byllesby company and associates.

Mr. Thomas brought back the following as proof of interlocking management:

"Resolved: That this corporation enter into an agreement with the Western Utilities corporation to the effect that the Western Utilities corporation take over the management of the affairs of this corporation and supply the usual supervisional legal and engineering services incident thereto receiving in remuneration therefor payment based on actual time worked (either directly for, or this company's proportion of same) at the following rates:

Chief engineer $75.00 per diem; senior engineer $50.00 per diem; assistant engineer $35.00 per diem; junior engineer $35.00 per diem; junior engineer $25.00 $10.00 per diem plus accual travper diem; and clerical help at eling out of pocket expenses. For services rendered in connection with capital expenditures, the rates of pay shall be on the actual cost basis to the Western Utilities Corporation and with respect to legal services as hereinafter set forth.

"In addition thereto as a part of said compensation for said services this corporation agrees to pay to Western Utilities corporation its proportion of the monthly legal retainer paid to its attorney or attorneys by Western Utilities Corporation.

"It is expressly understood that the above services shall not include any special services or unusual legal or engineering services but that all of such special services shall be paid for at the reasonable value thereof or on a per diem basis as may be agreed at the time.

"Be it further resolved: that the payments by this corporation to Western Utilities corporation to Western Utilities corporation of bills previously rendered be, and the same are hereby approved."

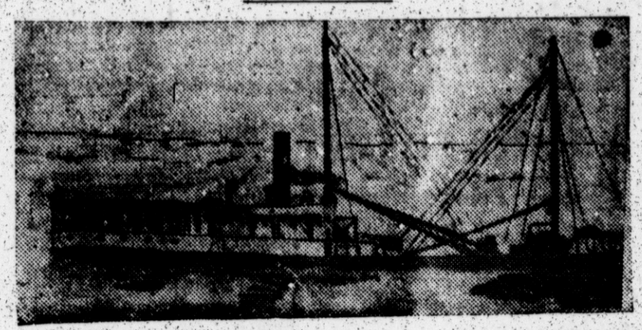
PREPAREDNESS

Johnny was very hard on trousers. One day, while shopping with a friend his mother bought cloth for a pair of trousers for Johnny, but ordered a good bit more than seemed necessary.

"Why do you get so much?" asked the friend who was with her.

"Oh," was the reply, "this is for reserved seats."

J. B. Stetson Crashes on Rocks of Cypress Point



The J. B. Stetson as she floundered on the rocks off Cypress Point into which she drifted in a heavy fog Sunday morning.

Hundreds of people thronged to Cypress Point Monday and Tuesday to see the J. B. Stetson of Long Beach as she wallowed in the waves after being washed on the rocks at 1:30 Sunday morning, due to a dense fog.

Twenty-one men, who comprised the crew were taken to safety by the coast guard cutter Daphne.

The Stetson, captained by Carl F. W. Hubner, was a wooden vessel built twenty years ago for passenger service, and recently used as a freighter.

A series of blasts on the whistle aroused Mrs. J. F. Guthrie, matron at Cypress Point Golf club, who immediately telephoned the Monterey police department that a ship was in distress and the police set out to notify the coast guard. This they did by getting in touch with coast guard headquarters in San Francisco and headquarters in turn notifying the Daphne through the radio.

When the Daphne approached the wreck about six a. m. the crew with the exception of the captain and two of his men remained until they decided nothing could be done.

Men worked valiantly Monday salvaging what they could from the sinking vessel.

The Stetson was said to be valued at $25,000 and to be carrying a $5,000 cargo. She was on her way from San Diego to Monterey.

SAY RUMMAGE SALE IS VERY SUCCESSFUL

According to the ladies who worked so hard to put it across, the rummage sale sponsored by the ladies of the Community Church, beginning the 29th, was a very successful affair. Miss Agnes Williston, head of the committees, asked the Sun to express her appreciation to all her committees and to the public in general for their splendid spirit of cooperation. The public responded magnificiently for contributions and the committees worked tirelessly for the sale of the merchandise, she said.

Things of use that were unsold were given to the Salvation army and to the Sunset cupboard, and some trinkets were put away to be used in grab bags at future affairs.

CHARLES GRIMSHAW IS NEW STATION LESSEE

Charles Grimshaw, who for the past several months has been located with oil companies in Monterey and Pacific Grove, has returned home and has leased the Signal Oil station at the corner of San Carlos and Seventh.

Charles is a hustler and is going after business. He made hundreds of friends here while he was connected with the Associated station at Sixth and San Carlos, which is operated by his father.

Best wishes are with him in his new venture.

BARNET SEGAL HAVING BUILDING REMODELED

Anticipating a call for store buildings near the new postoffice Barnet Segal is having his building in the postoffice block remodeled so as to provide for two business firms. Mr. Segal indicates that the rooms are already spoken for.

LADS STEAL PURSE; PURCHASE AIR RIFLE

Two young boys about eight and ten years of age hid in the sand dunes Monday and when a young woman bather went into the water and left her purse under her clothing, they noted the hiding place and appropriated the money to their own use.

Hurrying to town with their spoils, they purchased an air rifle and went back to the beach to practice with it. Due to their acquisition of the gun and their attempting to change a five dollar bill, they were apprehended as the thieves. This, officers say is not their first offense. The rifle was returned to the merchant and the money returned to the young woman.

MRS. VARIEN INSTALLS FINE NEW EQUIPMENT

Mrs. Belle Varien of the Museum Beauty Parlor in Pacific Grove announces in this issue of Carmel Sun the installation of a new set of dryers that are such an improvement over the old type one wonders why they had not been perfected before.

The "caps" are very small and fit the head so closely that scarcely any heat escapes to make one uncomfortable. This feature makes for drying the hair in one-half the usual time.

Mrs. Varien numbers many Carmel people among her satisfied customers.

Mr. and Mrs. E. B. Frederick, Mr. and Mrs. Ostrander, and Mrs. Corinne Frye of San Francisco and Mr. and Mrs. Ross of San Jose spent the week-end in the Frederick's Carmel home on Casanova.

Ralph James has gone to Berkeley to attend an arts and crafts school. Ralph is very clever and friends predict his success in his chosen field.

KNOTT COTTAGE IS DESTROYED BY FIRE

Responding to a fire alarm Friday morning at 4:30, the Carmel fire department rushed to a blazing cottage at Tenth and San Antonio, owned by L. E. Knott. The house was too far gone to save but the garage on the same lot was kept from burning.

The fire was probably caused from smouldering rags or a cigarette stub, according to Fire Chief Leidig, who stated that the tenants had only recently left and that the house was being cleaned Friday.

Mortgage Included

Customer—But you didn't tell me about the mortgage on the house.

Owner—Don't you remember? I told you it had all the modern improvements.

Funny Thing, Age

"A very handsome woman, that Mrs. Miller.

"You ought to have seen her 15 or 20 years ago when she was 10 years younger."

Latent Heat

Latent heat means a quantity of heat which has disappeared, having been employed to produce some change other than elevation of temperature. By exactly reversing that change, the quantity of heat which has disappeared is reproduced. Maxwell defines it as the quantity of heat which must be communicated to a body in a given state in order to convert it into another state without changing its temperature.

Time to Produce a Book

It has been calculated that the whole time taken in the production of an ordinary book of about 100,000 words, from the casting off and the composition to the machinery and binding, and from the first dispatch of the copy to the printers, to the return of the completed book, is about 12 weeks in all. Even then, the business of actual publication has not been counted in the estimate.

Washington's Time Ball

Many visitors to Washington notice a large ball mounted on the center flagpole of the State department (formerly the State, War and Navy building) and wonder at its purpose. It is what is known as a time ball and outdoor workers in and around the capital have been regulating their watches by it for about 50 years.

The Year of Jubilee

The year of jubilee occurred in Jewish history once in 50 years, in commemoration of the deliverance from Egypt. In this year the fields were allowed to lie fallow, land was restored to its original possessors, and those who had been forced to let themselves out for hire were released from bondage.

Sanitarium, Sanatorium

A sanitarium is distinguished from a sanatorium by the fact that it is an establishment where the treatment of its patients is wholly or almost wholly prophylactic; whereas a sanatorium is one which is favorable to preserving the health of its patients.

Cannot Copy Insects

The French academy has found that modern airplanes are less efficient than insects. If a machine weighing 250 pounds could be built on the same lines as an insect it would need only 3.5 horse power to fly at a good speed.

Oldest Irish School Found

The search for the oldest school in the Irish Free State is believed to have ended with the inspection of the records of St. John's college, Kilkenny, which was founded by Piers, earl of Ormonde, in 1538.

Gasoline Consumption

An automobile running a certain distance at a speed of 60 miles per hour will consume approximately 20 per cent more gasoline than the same car going the same distance at a speed of 30 miles per hour.

Waves Overcome Obstacles

Communications with micro waves a foot and a half long over distances greater than the range of vision and through and around physical obstacles were recently reported.

4,000-Year-Old Boat Found

A 4,000-year-old boat was found in a bog at the hamlet of Loknevi in Helsingfors. It is twelve feet long, built of pine and contained some primitive fishing tackle.

Leaning Tower Due to Mishap

The leaning tower of Pisa was meant to rise straight from the ground, but sank on one side when only thirty-six feet high, so its builders just finished it that way.

Bones Older Than Mammoth

The bones of an elephant of the Quaternary epoch, older than the mammoths, were found at Saint Vallier, France, in a clay bed thirty feet below a quarry.

Britain Records King's Voice

By putting the metal record of one of the king's speeches in a copper container England hopes to preserve his voice for thousands of years.

Color of Flannel Not Healing

Science has discovered that flannel's healing power has no relation to its color, in spite of the old belief concerning red flannel.

Early Garden Book

Charles Evelyn's "Lady Recreation," 1707, was the only English book written during the Eighteenth century for women gardeners.

Hand Knitters in Shetland

There are 9,000 hand knitters in Shetland, which represents 75 per cent of the total female population of the islands.

Pirates Still Ply Off China

Pirates still sail the seas and carry on an old trade on the coast of China and off the north of Africa.

Ancient Specialists

According to Herodotus, the ancient Egyptian doctors were as specialized a class as today.

Chinese Gods Plentiful

With their great variety of gods, the Chinese have nearly half the year devoted to gods' birthdays.

WOMEN VOTERS WILL HOLD LUNCHEON MEET

The local League of Women Voters will hold its next luncheon meeting on Wednesday, September 12, at twelve o'clock noon in Holman's solarium. The Honorable Chris Pesperson, state senator from San Luis Obispo county, will speak on the new "Syncro Tax," a measure to be presented at the November elections. The proposed constitutional convention, the veterans' farm and home purchase act and other measures to be placed on the November ballot will also be discussed.

Reservations for luncheon may be made not later than Tuesday noon through Mrs. Susie Chakurian (telephone Monterey 7394); or Mrs. Kissam Johnson (telephone Carmel 710). The meeting is open to all wishing to attend. Those with cars and available room, and others desiring transportation are asked to communicate with Mrs. George W. Reamer (phone Carmel 914W) so that arrangements can be made.

GRANDAUGHTER CARMEL COUPLE IS MARRIED

Due to the prominence of her grandparents, Mr. and Mrs. Charles Parmalee Eells in this city, the marriage of Miss Marion Eells, their granddaughter, at Ross, is of interest here. Miss Eells was married to Mr. Sherman Cornwall at St.John's church in Ross, before several hundred wedding guests. The newlyweds will make their home in Gonzales.

MOTOR ACCIDENTS ARE INCREASED 3.6 PER CENT

According to a report from the state motor vehicle department, the first half of the year 1934 saw an increase in motor vehicle accidents over the first half of 1933 of 3.6 per cent. 195 more persons were killed in traffic crashes this year than last and there was an increase of 18.8 per cent in resultant deaths. 1002, or 2 per cent more were injured.

The department lays the increased accidents and deaths to intoxicated drivers and pedestrians.

"There is no doubt whatever that the liquor factor is playing the chief influence in developing the increased mortality," the report states.

Real Fighters

Captain—Why did you retreat? You had the other side outnumbered and technically defeated.

Sergeant—I know, captain, but a nest of hornets got into the game.

MME. VAN LOBEN SELS CHARMS MUSIC LOVERS

In response to a demand that Mme. Marguertha van Loben Sels play for the music lovers of Carmel, Denny-Watrous prevailed upon that famed pianist who spent the summer here, to appear in a recital at the gallery last Thursday evening.

Brahms, Beethoven, Bach, Mozart, were all delightfully interpreted and her hearers, who filled the gallery, were enthusiastic in their praise and in their appreciation of her consenting to appear here.

Mme. van Loben Sels left Friday for Piedmont to resume her classes. She expressed herself as having had a very delightful summer.

NATURAL GAS DEPENDABLE

for SKYSCRAPER *or* BUNGALOW

Only GAS HEAT does a thorough job!

IN the newer homes and in practically all of the spic and span new apartment buildings Natural Gas is the preferred fuel. And why?

It is the dependable fuel. When you want it, it is ever-ready to serve quietly and efficiently, without ordering or storing or handling.

It is so easy to put to work and keep at work. Modern gas heating equipment is controlled in operation by automatic thermostat, electric buttons or handy manual control. Quick and silent to start or stop, it is ideal for either short periods of heating or hour after hour of comfort giving warmth.

It is the clean fuel for it is delivered clean and burns clean. Even through but one winter heating season the money Natural Gas heating saves in cleaning and redecorating costs goes a long way toward paying your heating bills.

Only Natural Gas heating does this thoroughly dependable job of carefree, clean heating. Why not have Natural Gas heat? Enjoy the extra benefits this modern heating gives you. Make the change to Natural Gas this month—right now!

Buy Firestone
SAFEST TIRES IN THE WORLD!
PRICES REMARKABLY LOW!
Here's PROOF OF SAFETY
TWO BREATH-TAKING ENDURANCE RUNS LAST WEEK ON SAME TRACK—A DRAMATIC COMPARISON OF SAFETY! READ BOTH LETTERS!
Ab Jenkins praises Firestone tires in toughest endurance run he ever made.
Lake Bonneville, Utah Aug. 16th, 1934
Mr. Harvey S. Firestone, Chairman, Firestone Tire & Rubber Company, Akron, Ohio
Dear Mr. Firestone:
Under A.A.A. supervision, I have just completed a 3,000-mile run on the hot salt desert at Lake Bonneville, Utah, averaging 127.2 miles per hour, breaking 77 Speed Records—without any tire trouble. Firestone Tires gave an almost unbelievable performance, with temperatures as high as 120 degrees.
Last year I made a similar run with a car of less power and speed using tires of another make whose national advertising featured blowout protection. Yet, I had a blowout and made a number of tire changes.
This year I also used Firestone Spark Plugs and a Firestone Extra Power Battery with your new All-Rubber Separator. Not a Spark Plug failed and the Battery required no service of any kind.
If every car owner knew what my Firestone Tires went through they would appreciate what Gum-Dipp'ng means in strength and heat protection that make Firestone Tires safe from blowouts. This is the toughest run I have ever made in my 23 years of breaking speed records.
Sincerely yours,
Ab Jenkins
THE Proof of leadership is performance! Many claim it, but Firestone proves it. Never before have tires withstood such severe, continuous, grinding torture, breaking 77 speed records for 3,000 consecutive miles at 127.2 miles per hour. Not a Gum-Dipped cord loosened, not a tread separated, not one blowout.
Hour after hour, on through the scorching heat of the day and inky blackness of the night, with temperatures as high as 120 degrees—breaking record after record for speed, strength, safety and blowout protection—all in a stupendous demonstration of safety performance for the car owners of America. This was made possible by Gum-Dipping, which coats every cord fiber with liquid rubber.
For your holiday trip have the Firestone Service Dealer or Service Store equip your car with Firestone Tires and Spark Plugs, install a Firestone Battery and reline your brakes with Firestone Aquapruf Brake Lining. Protect your life and the lives of your family with the safest tire in the world. Buy them this week before prices go higher.

Wilbur Shaw, using a fully equipped competitive tires had six tire failures preventing him from establishing records worthy of the car in which he drove
Lake Bonneville, Utah Aug. 13th, 1934
Mr. Harvey S. Firestone, Chairman, Firestone Tire & Rubber Co., Akron, Ohio
Dear Mr. Firestone:
I have just finished a 2,000-mile test at Lake Bonneville, Utah, driving a stock car of a leading manufacturer, equipped with tires which a large manufacturer has recently brought out as the newest development in tire construction. I had eleven tire failures and made two precautionary tire changes.
When a right front tire blew out, I was unable to get the car under control for a quarter of a mile, leaving a trail of rubber and fabric on the hot salt beds.
After this experience, I appreciate what a vital part Firestone Gum-Dipped Tires have played in my success during the fourteen years I have used them on my racing and personal cars. Without them I know I could never have made the many speed records I have established.
Very truly yours,
Wilbur Shaw

A. C. GRIMSHAW

CHRISTIAN SCIENCE CHURCHES

In all Christian Science churches, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., a Lesson-Sermon will be read Sunday, September 9, on the subject of "Man."

The Golden Text will be: "As many as are led by the Spirit of God, they are the sons of God" (Rom. 8:14). Bible selections will include the following passage from Matthew 5:14, 16: Year the light of the world. A city that is set on a hill cannot be hid. Let your light so shine before men, that they may see your good works and glorify your Father which is in heaven."

Passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, will also be included which read as follows:

"Deducting one's conclusions as to man from imperfection instead of perfection, one can no more arrive at the true conception or understanding of man, and make himself like it, than the sculptor can perfect his outlines from animperfect model, or the painter can depict the form and face of Jesus, while holding in thought the character of Judas —Through many generations human beliefs will be attaining diviner conceptions, and the immortal and perfect model of God's creation will finally be seen as the only true conception of being." (pp. 259, 260.)

CIVIL SERVICE EXAMS

The United States Civil Service Commission has announced open competitive examinations as follows:

United States game management agent, and deputy United States game management agent.

Full information may be obtained from F. J. Mylar at the postoffice.

The Mean Thing

First Actress—I like to act in a play that brings tears.

Second Actress—Won't any play you're in do that?

Couldn't Stand Himself

An elderly man became somewhat worried about himself and went to see a doctor. The doctor listened and smiled.

"My dear sir," he said, "this little habit of talking to yourself isn't anything to worry about."

"Isn't it?" said the patient, indignantly. "You don't know what a darned bore I am."

BUSINESS ORGANIZATIONS PLAN CELEBRATION

Big things are on the program for the ceremonies incident to the opening of the Carmel-San Simeon highway the first of which will be held next Sunday. The letter of invitation reads:

"The Monterey Chamber of Commerce, the Pacific Grove Chamber of Commerce, the Carmel Business Men's association, and the Monterey Peninsula Junior Chamber of Commerce are joint sponsors of a ceremony to be held in connection with installation of the first of the new State highway numbered signs. On behalf of these organizations I have the pleasure of inviting you to be present on this occasion, Monday, September 10, the Admission Day holiday, at 2:30 p. m. at the junction of the Monterey, Pacific Grove, and Carmel highways, which is at the top of Carmel Hill.

"These new numbered signs are similar to, and will suplement California's numbered system of U. S. Highways, which have proven so effective in directing travel. The plan to apply the numbered route plan to California's main State highways is the result of conferences between officials of the State Department of Public Works and executives of the California State Automobile Association.

"In arranging a ceremony appropriately celebrating the actual inauguration of this important project, citizens and civic leaders of the Monterey Peninsula area also are prompted by the fact that the coast highway, destined to become one of the most beautiful in America, has been designated as State Highway Route No. 1.

"The sign installation ceremony will be preceded by a barbecue at the Indian Village on the famous Del Monte Seventeen-Mile Drive at 12 o'clock noon and you should not miss this feature of the program.

"It is sincerely hoped that you will accept this invitation and thereby assist in assuring the success of the program. Please reply for convenience in preparation.

Cordially yours,
E. H. TICKLE,
"Master of Ceremonies."

El Salvador Is Truest Nation of the Americas

El Salvador is one of the most progressive and intensely cultivated countries in the Western hemisphere, according to a bulletin of the National Geographic society.

Although "Salvador," as the name of the country is generally abbreviated, seldom appears in the news it is distinctive in many respects among the republics of Central and South America. El Salvador is the smallest country, independent or dependent, on the mainland of either North or South America, and, excepting Haiti, the smallest nation in the Western hemisphere. It is the only country between Canada and Colombia without an Atlantic as well as a Pacific seaboard and it has the densest rural population on the mainland of the Americas. In an area about equal to that of Maryland live nearly 1,500,000 people.

Although it is fringed with rich tropical forests along its Pacific seaboard, and with volcanoes around its inland frontiers, the greater part of the country is situated on a healthful well watered and fertile plateau about 2,000 feet above sea level. Coffee is the chief crop, comprising about 80 per cent of the exports of the country.

The most unusual export of El Salvador, however, is the misnamed "balsam of Peru." Balsam, which is used for medicinal purposes, is the sap of a tree native to El Salvador. But the early Spaniards shipped the sap to Peru, where it was reshipped to Spain.

Cakes of Salt Used as Money in Asia, Africa

Salt as a standard in the history of commerce antedates the gold standard. As a medium of exchange salt was widely used in many ancient countries. The Mogul conquerors of India made decrees hundreds of years ago regulating the standard of salt that was used for money. In Asia and Africa cakes of salt were frequently used for money.

Besides being used as money, salt in days gone by was a powerful developer of commerce. Being essential to life and unavailable to tribes remote from the sea, from which the substance was obtained by evaporation, trade routes were early developed to provide the transportation of salt. For hundreds of years a caravan route was maintained between Palmyra and Syrian ports. Even today much of the caravan traffic in Sahara is largely in this precious commodity.

The oldest road in Italy is not the Appian way, but the "Via Salaria," the salt road along which salt was anciently carried from the evaporating pits at Ostia to the Sabine territory.

Musical Sea Water

Science has cleared up the mystery of the musical sea waters off the English coast, says Popular Mechanics Magazine. For ages fishermen have steered their craft in the vicinity of the perilous shores in fogs by listening to the "sound" of the water. Through long experience these men could tell their exact position in proximity to reefs and rocks, as well as the safety of deep water, by listening to the various sounds coming from the depths. It has been found that this "music" is caused by various ocean currents scraping different kinds of sea bottom. The metallic sounds coming from certain quarters are said to be due to currents striking submerged rocks, ringing them like a bell. Every bay and headland and strait has its own note, which fishermen learn in time and recognize even in time of dense fog. These notes serve as guides for the small craft in thick weather.

Stags Will Be Stags

Not all of the deadly battles that are frequently engaged in by buck deer during the mating season occur in their native forests. At Whipsnade zoo, it has been found impracticable to try to prevent such battles among the stags confined there and when the animals cannot be judiciously kept apart they are left to fight it out and the vanquished, if living, is shot or taken to a hospital. Formerly when trouble was brewing the keepers would remove the does, over which the bucks fight, to a separate, fenced-in enclosure, but this appeared to do no good. Among other methods tried in the hope of separating the bucks once a battle had started, was to play the hose on the animal that appeared to be winning, but such tactics usually resulted in his fighting with even greater determination than before.

It Could Be Colder

Has it ever occurred to you what would happen if the sun suddenly went out like a light that has fused? For eight minutes we should know nothing about it, for it takes eight minutes for light to pass through those 93,000,000 miles that separate us from the sun. When that eight minutes had passed darkness would freeze the sea from end to end. In a little while the air would first become liquid then solid. By the third day the animals and birds would all be dead. Man might live for another seven days, but soon the fires would be frozen out and mankind would die, too.

BOB DALTON PROFESSIONAL AFTER NEXT WEDNESDAY

Jack Dalton and son, Bob, have just returned from an extended trip into the northern part of the state where Bob met five opponents in the ring and came off victor in each instance.

Bob, who holds the title for amateur lightweight in California will "go professional" next Wednesday night at Yuba City.

"Bob is a husky, all right, but now that he will be fighting professionals, he will undoubtedly go up against some hard hitters" Jack said in speaking of his young son, who is not yet through high school.

Service

Waiter—Tea or coffee?
Guest—Chocolate!
Waiter (shouting)—Mixum.

CITIZENS' COMMITTEE GREATLY AUGMENTED

Due to criticism of the Citizens' Committee which had been raised by local Sinclair men when a page ad signed by the body appeared in the Monterey Herald before the primaries attacking the Americanism of the democratic candidate for governor, a meeting was called for Sunday night to set forth the aims and ideals of the organization.

Challenges from Sinclair men were hurled at the leaders of the citizens committee. All was cleared up, however, before the evening was over and more than 100 men enrolled and signed the following pledge:

"We, the undersigned, and each of us, believeing in American institutions, in a constitutional government, in the ataining of social justice and economic independence by lawful evolutionary rather than by unlawful revolutionary methods, and in the principle of majority rule, hereby associate ourselves together as members of the Carmel Citizens Anti-Communistic Association and jointly and severally pledge ourselves as follows:

"1. To support the Constitution of the United States and of the State of California;

"2. To restrict by every just, lawful, and honorable, means within our power the revolutionary programs of the communist, facist, nazist and other similar groups, and parties, designed to overthrow our government by force."

HOME FOOD SHOP IS NOT UP FOR SALE

Due to the unfortunate wording of an ad which appeared in the Monterey Herald, offering for sale the Home Food Shop of Carmel, Mesdames Browne and Stone of the authentic Home Food Shop were kept busy answering inquiries this past week-end.

The Home Food Shop has not been advertised for sale, although it is closed for the coming two weeks. It will open September 22, after a good renovating and after its owners have taken a much needed rest.

Couldn't Daunt Him

"I must tell you that my daughter can bring a husband only her beauty and her intellect."

"I don't mind—many young couples have started in a very small way."

Why Napa Wine
IS OF UNSURPASSED QUALITY—

Napa was one of the first counties in California in which grape vines were cultivated. These fertile hills, basking in golden sunshine, with the proper amount of moisture, have produced vintages known throughout the country as California's best wines. The Napa Wine Co., exclusively represented on the Monterey Peninsula by Turano's Market, is one of the oldest wineries in the state, producing numerous dry wines, among which are Carbenet, Burgundy, Zinfandel, Chiante, Claret, Sauterne and Reisling.

When you want to buy a good table wine don't forget to try Napa wine—it is proven—it is guarnateed — nothing but the best.

WHO'S WHO FOR OFFICE SETTLED OFFICIALLY

Offices which were not absolutely "sure" last week, have been settled by official reports.

Patterson was given a good majority for assemblyman. Brazil had a lead of 224 over Thiele to run against Noland for the office of district attorney. Steinbeck and Giles who will meet in the November election for treasurer came within 131 of tieing, Steinbeck taking a last minute lead.

Miss Sally McCune, a recent graduate of St. Helen's Hall in Portland, is a guest this week of her aunt, Hallie Sampson. Miss McCune is on her way to Hong Kong where her parents live.

CAPTAIN PERRY NAMED HEAD CARMEL CHEST

Carmel people will be solicited for the peninsula community chest by Captain Perry of the Salvation Army, or one of his helpers at the coming chest drive.

"I don't know how I'll get along," said Capt. Perry to a Sun representative, "but so far I have been treated very nicely and many of the business people have promised me their cooperation."

Dr. and Mrs. Wesley T. Davison have returned to their home here after spending three months in Canada.

Mr. and Mrs. B. F. Minges and daughter, Miss Marion, drove up to Yosemite, taking advantage of the long week-end.

Miss Ruby Fraley, who has spent the past year in school in Los Angeles, was visiting Carmel friends last week. Miss Fraley was a prominent member of the late Abalone League.

Mrs. Florence J. Donnelly, until Christmas last year with Stella's Dry Goods store, left this week for her home in San Jose after spending some time visiting friends here. Mrs. Donnelley is staying at the home of her daughter.

Miss Audrey Walton is again at her station in the Red Cross office after a delightful two weeks' vacation spent in the Sierra, Reno and Salt Lake. While she was away Miss Walton also did some Red Cross research work.

Mrs. Karl F. Meyer of San Francisco is staying at the La Playa for the winter and is delighting in Carmel's lovely climate. Mrs. Meyer is the wife of Dr. Meyer, director of the Hooper foundation in medical research for the University of California. Dr. and Mrs. Geiger brought Mrs. Meyer down last Saturday and spent the day here.

Mr. and Mrs. T. P. Andrews of San Francisco spent the week-end here with their daughter, Miss California Andrews, of Lavendar and Lace.

Mr. and Mrs. R. F. Haller and son, Bobby, returned home this week from a two weeks' vacation spent with relatives on a ranch near Austin, Nev. Bobby had the time of his life and is a full fledged cowboy and roughrider.

Traces Stone Age to Montana

Traces of a Stone Age civilization which apparently prevailed many centuries ago in northern Montana have been unearthed. Rock circles and a 20-pound hammer are among the relics.

Persian Race Hounds

Saluki racing is popular in England and record crowds turn out to watch these Persian greyhounds run. They are considered the speediest of all dogs and can outrun a race horse.

Labrador, First and Last

Although Labrador was the first part of America to be discovered, for the Vikings undoubtedly reached there centuries before Columbus, it has remained the last to be developed.

Ship's Odometer

The ship's log is an instrument towed by the vessel by which the distance sailed is ascertained. In steam vessels the distance traveled is determined by the drive of the engine.

Anise Once Used as Money

An herb of many uses is anise. It was cultivated by the ancient Egyptians and in scriptural days was used in part payment of taxes.

Beer Once Was Medicine

Beer was regarded by the Egyptians of 4,000 years ago as one of the most popular of medicines, declare European archeologists.

Rare Indian Pottery Found

Pottery made by prehistoric Indian inhabitants of America, unlike any pottery found before, was discovered in Arizona.

Elephants Protected

Hunting of elephants has been banned in the Mwanza territory and the Tanganyika region of the Belgian Kongo.

Persia Had Highways 500 B. C.

As long ago as 500 B. C. Persia had a highway system with permanent signs.—Popular Mechanics Magazine.

First Edition Brings $400

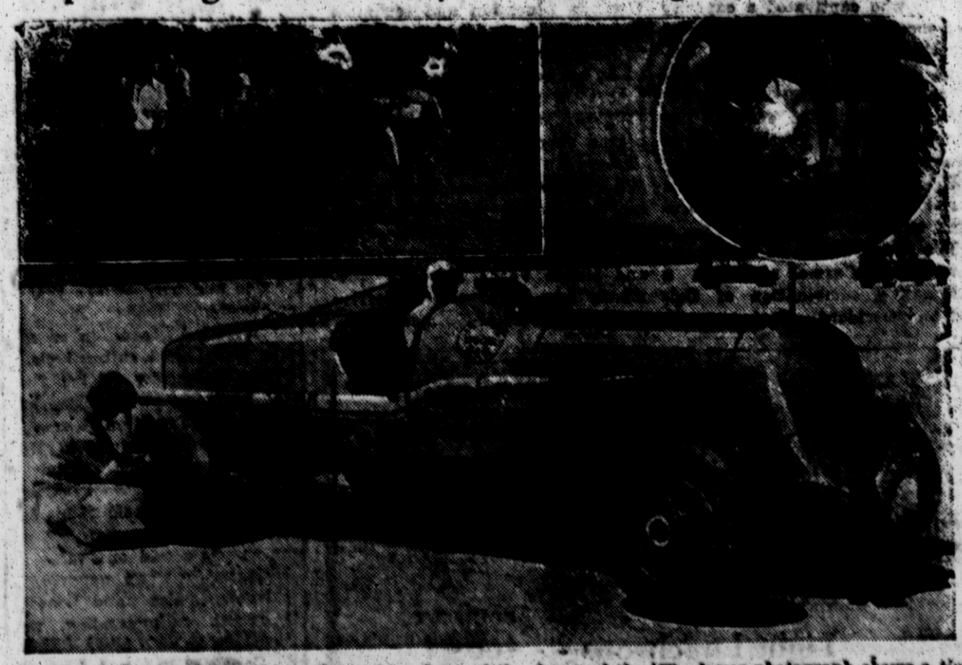
Speed King Shatters Many Records Using Firestone Tires



Ab Jenkins, veteran speed king, shattered 77 world, international and A.A.A. speed records in his recent 24-hour run on the hot salt desert at Lake Bonneville, Utah. Jenkins is shown above hurtling through space at an average speed of 127.2 miles per hour including all stops for a distance of more than 3,000 miles, — through the scorching heat of the day, and the black of the night, with temperatures as high as 120 degrees. The inset at the left shows workers on the desert. Previous to the run, holes on the course had been filled with crushed rock as hard as granite with knife-like edges. At the right Jenkins is shown receiving congratulations of his proud mother. The lower photograph shows a tire check-up of the big 2½-ton 240-horsepower machine by E. Waldo Stein, Firestone field representative who saw the tires, battery and spark plugs made by his company come through this greatest of all endurance runs without trouble of any kind.
